1. Introduction

The Talent Recruitment & Training Management System is a web-based platform designed to connect trained talents with employers while maintaining candidate privacy.

The platform also serves as a training management system where candidates undergo structured learning before entering the talent pool.

The application will consist of four major user portals:

- Public Website
- Talent Portal
- Recruiter Portal
- Trainer Portal
- Super Admin Portal

2. Project Objectives

The system aims to:

- Build a verified talent database
- Manage candidate training
- Connect employers with qualified candidates
- Protect candidate identity
- Automate recruitment requests
- Track candidate performance
- Generate recruitment reports

3. Stakeholders

- Visitors
- Talents (Candidates)
- Recruiters
- Trainers
- Sales Team
- Administrators
- Super Admin

4. User Roles

4.1 Visitor

Permissions

- View website
- Read blog
- View training programs
- Register
- Login

4.2 Talent

Permissions

- Register account
- Complete profile
- Upload documents
- Pay training fee
- Attend training
- Take assessments
- View progress
- Download certificate
- View application status

4.3 Recruiter

Permissions

- Register company
- Pay recruiter subscription
- Search candidates
- Filter candidates
- View anonymous candidate profiles

- Submit placement requests
- Track request status

4.4 Trainer

Permissions

- Login
- View assigned batches
- Mark attendance
- Upload scores
- Upload assessments
- Leave remarks
- Manage course materials

4.5 Super Admin

Permissions

Complete control over every module.

5. Functional Requirements

Module 1

Public Website

Features

- Home Page
- About Us
- Services
- Training Programs
- Gallery
- Events

- Testimonials
- Blog
- Contact Page
- FAQ
- Login
- Register

Module 2

Authentication

Users can:

Register

Login

Forgot Password

Reset Password

Verify Email

Logout

Role-based login

Roles include:

Talent

Recruiter

Trainer

Admin

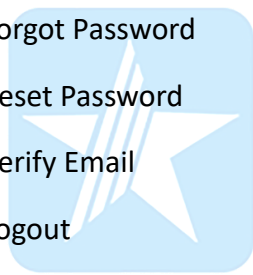

Module 3

Talent Registration

Required Information

Personal Information

- Full Name

StarTechOne
NIGERIA LIMITED

- Email
- Phone Number
- Gender
- Date of Birth

Professional Information

- Education
- Skills
- Certifications
- Work Experience

Documents

- Passport Photograph
- Resume

- Certificates
- National ID

System Generated

Candidate Reference Number

Example

TAL-2026-00021

Module 4

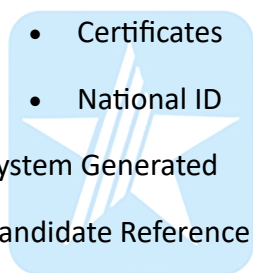

Training Payment

Candidate pays:

Training Fee

System Features

- Payment gateway integration
- Payment receipt
- Transaction history
- Payment verification

StarTechOne
NIGERIA LIMITED

- Automatic activation

Supported gateways

- Paystack
- Flutterwave

Module 5

Learning Management

Each training contains

Modules

Lessons

Videos

PDFs

Assignments

Quizzes

Attendance

Final Assessment

Certification

Candidate Dashboard shows

Progress %

Completed Modules

14. Third-Party Integrations

Payment Gateway

Paystack

Flutterwave

Email Service

SendGrid

Brevo

Mailgun

Cloud Storage

AWS S3

Cloudinary

Google Drive (optional)

Maps

Google Maps

Authentication

Google Login (optional)

Microsoft Login (optional)

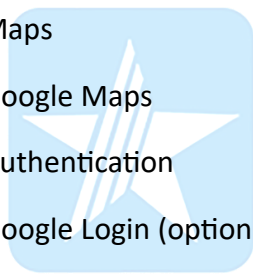

15. Recommended Technology Stack

Frontend

- React.js (Vite)
- Redux Toolkit
- React Router
- Axios
- Material UI or Ant Design

Backend

- Node.js
- Express.js

StarTechOne
NIGERIA LIMITED

Database

- MongoDB

Authentication

- JWT
- Refresh Tokens
- bcrypt

Storage

- Cloudinary or AWS S3

Deployment

- Vercel (Frontend)
- Render, Railway, or DigitalOcean (Backend)
- MongoDB Atlas

16. Project Deliverables

Phase 1

- UI/UX Design (Figma)
- SRS Approval
- Database Design

Phase 2

- Public Website
- Authentication
- User Management

Phase 3

- Talent Portal
- Recruiter Portal
- Trainer Portal

Phase 4

- Admin Dashboard

- Payment Integration
- Notification System

Phase 5

- Testing
- Bug Fixes
- Deployment
- User Training
- Documentation

Estimated Scope

From a development perspective, this is a **large enterprise-grade application**, not a simple recruitment portal. It combines several systems into one platform:

- Corporate website (CMS)
- Recruitment Management System (RMS)
- Learning Management System (LMS)
- Customer Relationship Management (CRM) for recruiters
- Payment and subscription management
- Role-based administration
- Reporting and analytics

A realistic implementation would likely involve **100–150+ distinct screens**, **80–120 backend API endpoints**, and **40–60 database collections/tables**, depending on the final feature set.
